Standard or custom built to fit your needs ...

Complete Tank Trailer Repair Service – Our services include all NDE examinations, hydrostatic testing, calibration, ASME repairs and alterations, sandblasting and painting.

14,550 gallon East Coast Special Propane Trailer with tri-axle suspension to take advantage of increased weight laws that allow bigger pay-loads in several states.

18,200 Gallon Propane Trailer equipped with 6 axles to allow huge pay-loads under Michigan's high gross weight limits.

5,600 Gallon Insulated Co2 Trailer with optional stainless tell jacket. Custom built units available in various sizes with host of options including self-unloading systems, metering systems, various running gears, custom painting and much more.

6,850 Gallon Refrigerant Gas Trailer equipped with optional gasoline-driven unloading system, micro-filtering system and inert gas purge upon delivery.

CERTIFICATION – All Mississippi Tank trailers are designed and constructed in full accordance with United States Department of Transportation and Federal Highway Administration regulations and the ASME Code. Our company is registered with DOT for the design, construction, requalification and repair of MC-331 trailers. We are registered with the National Board and we maintain U and R ASME certificates.

Mississippi Tank Company is the industry leader.

Standard Plumbing Arrangement (shown with Brake Interlock System)

Nosebox and Trip Release BETTS Nose Boxes

Bolted Aluminum Anti-surge Baffles

For over 70 years our transport trailers have been setting the standards for others to follow. Engineered for maximum payloads, they provide low cost service over millions of trouble free miles in fleets from coast to coast. From tank to taillight the finest quality is assured because all work, including tank fabrication and assembly, is done under the watchful eye of the industry's most exacting quality control specialists. We can build transports to your specification, or our engineering staff will design units for your individual needs.

STANDARD EQUIPMENT

Standard Plumbing Arrangement is piped to both sides with separate manual valves and furnished with solid stainless steel blow-downs for each manual valve, piped to top of trailer for improved safety.

Nosebox and Trip Release BETTS Nose Boxes standard, typically mounted on front street-side for easy access. Air remote emergency trip devices, in conjunction with open stainless steel cables and guides, prevent corrosion and insure years of trouble-free operation.

Bolted Aluminum Anti-surge Baffles, standard on our trailers, are attached with heavy-duty steel plates on welded pads, providing the strongest, yet lightest interior baffle systems available.

TRAILER OPTIONS INCLUDE:

- Work lights
- Rear plumbing
- Wide turn signals
- Custom plumbing arrangements
- Air ride suspensions
- Hose troughs (tubes standard)
- Trailer roll stability systems
- Hydraulic pump drive

- Various running gears
- Custom painting

11,600 Trailer

Mississippi Tank Company,
has two locations from which to
serve our customers. The

headquarters, located on 20 acres
in Hattiesburg, Mississippi, consists
of approximately 175,000 square feet
of manufacturing facility. The Indiana
division is located in Vincennes, IN.

The headquarters is well positioned for
interstate highway access and in close
proximity to the port cities of Mobile, AL
and New Orleans, LA. For over 70 years we
have provided quality service, workmanship
and products for the LPG industry.
